

“GXS was incredible to work with... they got information to me quickly so we could be up and running as soon as possible. The Accounting Package Accelerators have really streamlined EDI with our largest clients.”

— KELLI BELL, FANCY POKKET

# Fancy Pokket

## Profile

Since its inception in June 1989, Fancy Pokket Corporation has established itself as one of Eastern Canada's leading manufacturers of specialty breads including bagels, pizza crust, Greek pita, flatbreads and tortilla wraps. Fancy Pokket products are available in retail outlets from Newfoundland to Ontario to the Caribbean Islands.

## The Challenge

To conduct transactions, Fancy Pokket relied on a dial-up, DOS-based system to exchange invoices, purchase orders and other EDI transactions with its trading partners. As a result, the accounting staff at Fancy Pokket had to check the DOS-based system several times throughout the day to see if new EDI documents had arrived. Once a new document arrived, the staff had to manually enter the information into BusinessVision, their accounting system. The process was time-consuming, error-prone and manually intensive.

## The Solution

To streamline operations and eliminate manual processes, Fancy Pokket implemented Accounting Package Accelerators from GXS. Supporting past and current versions of over 35 different accounting packages and simplifying trade to today's largest enterprises with pre-built maps, Accounting Package Accelerators allow small and medium-sized businesses (SMBs) to fully leverage existing accounting software investments.

Accounting Package Accelerators work by automatically picking up incoming EDI documents and integrating them directly into a business' accounting packages. The solution also works in reverse by turning outbound documents, such as invoices, into EDI documents to be sent to trading partners without the need to re-key data.

## The Results

By implementing Accounting Package Accelerators from GXS, Fancy Pokket removed the burden of certain manual processes from the company's accounting staff. They no longer need to re-key data from BusinessVision into the DOS-based system and vice versa. The solution has effectively streamlined operations between Fancy Pokket and its largest customers—increasing the company's productivity while eliminating errors in its accounting processes.

#### About GXS

GXS is a leading global provider of B2B e-commerce solutions that simplify and enhance business process integration, synchronization and collaboration among trading partners. Organizations worldwide, including 75 percent of the Fortune 500, leverage the GXS's Trading Grid™ to extend supply networks, optimize product launches, automate warehouse receiving, manage electronic payments and gain supply chain visibility.
